9:00AM

to

9:50AM

**Room: Medinah**

The Line, the Rich and the  
Wardrobe: A tale of BI

### ReportsNow

Join ReportsNow to learn how traditional BI impacts the bottom line—**both yours and the vendors'** who sell it—and how the tables (pun intended) have turned in your favor. Come discover what every company should know before entering the world of modern BI.

- Discover the root of high BI costs
- Understand the economic benefits of **"data-specific" BI**
- Learn the common-sense feasibility of true self-service BI

Speakers: Victor Dominey, Director of Sales, ReportsNow  
Kristen Bassett, Director of Pre-Sales, ReportsNow

**Room: Pebble Beach A/B**

Adopt & Optimize JDE's  
Continuous Delivery Model

### Denovo

You keep hearing Oracle talk about Continuous Delivery. What the heck does that REALLY mean? This session will focus on what that is, what it means and the benefits to your Company. Whether you are on 9.2 or **another JD Edwards release, let's have some fun and discuss this new methodology, technology, what is realistic and more. It's no longer has to be cumbersome, complicated, a company burden, or a strain on IT**

Speaker: Marce Ahrenberg, Sr. Account Executive, Steve Colgrove, VP West, Denovo

**Room: Hazelton**

Case Study: Using JDE  
Advanced WMS to streamline  
Warehouse Management

How do you implement a complex software solution to automate 8+ warehouses each with 100000+ SQ FT of space and 150+ employees to increase competitive advantage? Hear how a best practices based process, and how a strong implementation methodology, extensive training, & dedication to the original goals accomplished it. This session will describe the implementation that linked the supply chain execution processes using Oracle JDE Advanced WMS across multiple fulfillment channel and also describe the best practice based processes that were established to increase competitive advantage.

Speaker: Mohan Cavale, Principle Consultant, NextInfo

## Break /Go to Keynote in Majestic I

9:50 AM-  
10:00 AM

## KEYNOTE: MASTERING THE CHAOS! Professional Speaker for SCUG

10:00 AM  
- 11:00  
AM

### You love what you do

**But sometimes - It feels like it's all too much**

Learn to reconnect with that spark that fuels you while still balancing all that needs to happen on a daily basis. Dawn shares practical tools for navigating turmoil, prioritizing effectively, getting off the hamster wheel, and getting back to what you love.

Dawn Camacho is the founder of [Whole Life Solutions](#)- offering professionals in intense times of transition a holistic approach to clarity and order inside and out. She is a professional speaker on making major change effectively and living fiercely with purpose, intention, and clarity, as well as a coach for professionals at a crossroads. She wakes up every day grateful to do what she loves.

**Room: Medinah**

Citizen Developer: UX One, Composed Pages, One View, Grids, etc.

In this session, you'll learn how the latest Oracle JD Edwards applications and tools allow users within your organization to become more self-sufficient and less reliant on IT resources to accomplish their tasks.

- Demonstration of Citizen Developer tools
- UX One, Composed Pages, One View Grids, etc.
- How Citizen Developers came about
- Who, and what, are they in your organization

Speaker: Tom Gabriel, Solution Consultant, GSI

**Room: Pebble Beach A/B**

How the Home Depot purged 575 million JDE records

Join the Home Depot IT team & Kliik-IT team as we discuss (in-detail) how 10 years of data, totaling 700 GB and 575 million records, were archived and purged using Purge-IT, an integrated JDE purge and archive solution.

Learn why you should purge and archive as well as see why this is a JDE best practice.

Speakers:  
 Steven Benson, Senior Manager-IT, Home Depot  
 Candido Morales, Lead Systems Engineer, The Home Depot  
 Russell Stainer, Head of Sales-KLIK-IT Limited

**Room: Hazelton**

Supply Chain Planning SaaS Cloud for JD Edwards

The most successful enterprise-sized companies are those that effectively and efficiently streamline and optimize their supply chain management. A crucial cog in this process is demand planning, that complex process that gives enterprises visibility into their forecasting, including the ups and downs of demand. The ultimate goal is to laser-target revenue forecasting and maximize profitability for each supply chain channel.

With the right demand planning solution, your company can accurately predict customer demand, efficiently deliver products to customers, boost cash flow, and shape profitability for even the most complex global supply chain. As your company improves its accuracy in forecasting, you will benefit from better inventory turns and order fill rates.

How that is achieved, though, differs by company as each business has unique needs, goals, and processes. To help yours, here are advantages of Cloud solutions as well as examples of when on-premise integration of demand planning into internal IT infrastructures may make sense—**and then we'll provide a closer look** at Demantra.

Speaker: Brad Van Zeeland, Supply Chain Solutions Architect, CSS International

Track 2  
 11:00AM  
 to  
 11:50AM

**Networking Lunch, Exhibitors Hall  
 In Ballroom: Majestic I**

12:00 PM-
