Understanding Digital Transformation presented by PCB Apps

What is meant by "Digital Transformation?" How it is shaping the way we work in the world? We will cover Oracle's overview of the processes used in Digital Transformation before exploring examples that improve productivity, and change the customer experience. Examples in **Agribusiness** include spatial technology, mobility in the field, feedlots, and enhancements for successful delivery of refrigerated products. Examples in **Life Sciences** include electronic production history records, tracking of massive quantities of serial numbers, and enormous numbers of consigned items. **Keynote Speaker:** Joel Schipper, Trusted Adviser & Board member

10:00AM

10:50AM

How to modernize your Culture

Heartland has an average age of 33 years old, with many people in their 20's. They have built their organization to provide a comfortable, profitable, and results driven culture that is built towards common challenges in the modern workplace. This lecture will cover the employee lifecycle, modern business practices and what forward-thinking cultural alterations make all the difference in an organization's human capital, delivered by Heartland IT Consulting's CEO. The session will provide real life examples of the strategies used to build a high performing team and culture that rewards results.

Objectives:
Remote vs Flexible; Employee engagement vs. Management; Culture of learning vs Training
Speaker: Patrick Donlin, CEO/Founder, Heartland IT Consulting

Pebble Beach

One View Reporting Demo & Overview

Understand Oracle's direction towards a Digital Enterprise and how you control your organizations ability to achieve digital success.

- The evolution & need for the various reporting tools available within E1 & how they came to be
- The "structure" & integration of One View within your total enterprise wide solution
- How One View reporting can assist your organization in reaching today's Digital Transformation goals.

Objectives:
How One View reporting enhances the overall user experience in making today's critical day to day business decisions.
Speaker: Tom Gabriele, Senior Solution Consultant, GSI

Hazleton

Automate & Integrate A/P process

Join us for the presentation first seen at COLLABORATE 17, to learn how IntelliChief integrates to your JD Edwards application to automate Accounts Payable.

- Eliminate manual invoice data entry to JD Edwards.
- Reducing costs associated with processing and filing vendor invoices by 75%.
- Increasing automation & streamlining processes in workflow to reduce cycle time by 80%.

Objectives:
Enhancing visibility into the AP processes through reports & dashboards. Reducing the risk of late payment fees, while increasing the amount of early payment discounts.
Speaker: Heather Jones, Account Executive & Tim Nissen, Marketing Manager, IntelliChief
