9:00 AM – 9:30 AM	**SCUG Opening Session** Breakfast continues as you join SCUG to hear about what's in store for you during this one day conference style user group meeting, and get further updates about what's happening with SCUG and Quest in 2017! We will also briefly discuss Oracle's announcement on Continuous Delivery during this session!

9:30 AM – 10:30 AM

KEYNOTE ADDRESS: JD Edwards Roadmap

Exploring Applications and Tools Innovation

This session highlights new Support timelines and product innovations that are delivered in the latest JD Edwards EnterpriseOne releases, providing your organizations insight to help map a meaningful business strategy in today's connected, agile, and real-time businesses.

Join Bob Monahan, Vice President Product Management at Oracle, to learn how JD Edwards is the platform for competing in a digital economy

10:30 AM– 10:45 AM	**Network Break & Exhibitor Hall – Pacific Ballroom BCD**

	Santa Monica	Redondo	San Diego
10:45AM – 11:30AM	**Employ Agile PLM to enable shared knowledge of your products** *NexInfo – Accelerating Operational Excellence* How to employ Agile PLM to enable your organization to share, create & maintain your products on record. Learn how to increase productivity, lower development costs, improve product quality, accelerate time to revenue, and lower material costs **Objectives:** -What is PLM? -Why PLM? -PLM for different industries -PLM cross functional impacts -PLM best practices -Oracle Agile PLM overview -Achieving Operational Excellence **Speaker:** Wilma Flanagan, VP of PLM Practices and PLM expert, NexInfo	**2018 Sales Tax Changes You Should Know About** *Avalara* At the beginning of each year, new sales tax laws go into effect across many of the states. In order to stay compliant, you will need to apply these new laws to your current processes. In this session, Avalara's tax compliance expert will explain the new laws going into effect and break down what's being proposed – and what will likely impact your business. **Speaker:** Paul Turec, Strategic Alliance Manager, Avalara	**Gotchas & Tips for deploying JDE on Amazon Web Services (AWS)** *EMERALDCUBE SOLUTIONS* AWS is the largest provider of public cloud services, offering over 70 distinctive products across 16 different geographic locations worldwide. AWS has been around for 10+ years, however only recently have JDE customers started to adopt it. We will teach the core concepts and services offered by AWS that can be used with JDE E1. **Objectives:** -Understand Amazon Cloud services & capabilities -Learn which and how Amazon Cloud components & services can be used with JDE EnterpriseOne **Speaker:** Todd Chromzak, Managing Partner, EmeraldCube Solutions

	Santa Monica	Redondo	San Diego
11:45AM – 12:30PM	**Silgan University-The Joy & Pain of deploying a Cloud LMS** **SILGAN** & **iLearnERP** Join Silgan University as we move through the journey of creating and deploying a cloud learning management system. With the objective of advancing our acquisition timelines, deploying learning for multiple applications & supporting multi-divisional projects, we deployed a centralized cloud solution for key learning components **Objectives:** -Share the wins & challenges of leveraging a cloud tool for cross-functional purposes -Review acquisition best practices & how training integrated into the successful onboarding of new division **Speaker:** Will Cokeley, Director of IT at Silgan, Elizabeth Schriefer, President iLearn	**Get Current, Stay Current: Realize the Vision by Testing Smart!** **dws** innovation in action You are being advised to get & stay code-current. The problem is that historically it has never been easy to apply ESU's or run upgrade projects. There is a lot of uncertainty. What am I getting? What will a project mean to me and my business? How do I maximize any projects' value & minimize its disruption? Products that answer these questions that help guide your efforts, and that automate functional testing are the key to making all future JDE E1 project smaller, faster & smarter. They are fundamental to any plans you might have for getting & staying code-current. **Speaker:** Patrick Neary, Director Business Development, DWS	**Auditing Your Security Services with Cloud or Onprem** **Q Software** Auditing security of an ERP system can be time-consuming, with technical staff producing SQL script & complex spreadsheets. It can be difficult to get accurate answer to key questions such as what access can be granted and how SoD issues are adequately controlled. Inadequate planning & lack of process documentation can lead to cost overruns & even qualified audits. We will focus on understanding the compliance lifecycle & how to plan for successful audit, including demonstrating key controls, and tight change management. Let's provide some clues on how to solve this mystery. **Speaker:** Vrinder Singh, Director of Business Development, Q Software
	Networking Luncheon & Exhibitor Hall – Pacific Ballroom BCD		
12:30PM– 1:45 PM	Enjoy a full buffet luncheon with your JD Edwards friends and use this opportunity to share with each other how you use JD Edwards at your work places. Trade business cards and use this opportunity to visit with additional exhibitors as well.		
	Santa Monica	**Redondo**	**San Diego**
1:45 PM– 2:30 PM	**Tiers for Fears: How to Futureproof JD Edwards** **GSI** ERP Expertise. Business IQ. Cloud Sense. During the session, we will examine whether a single-tier ERP may not be enough to meet all your rapidly changing business immediate problems to grow & expand your business. What factors should you consider? How do you balance the need for change against the disruption of change? We will explore some of the challenges such as: -Mergers & Acquisitions -Global Expansion, New Business Models -Local Cultural or Regulatory Needs -Not Cost Effective or timely to meet business requirements **Speaker:** Shawn Scanlon, Executive Vice President, GSI	**Best Practices for Security & SOD Compliance in JDE** **ALLOUT Security** Learn tips and tricks for managing Security & SOD Compliance in JDE. This session includes a survey of downside risks and comprises input from JDE companies (from small to mammoth) and important cross-vertical information. **Objectives:** -Managing security risks. -Best practices to stay in compliance **Speaker:** Cynthia Milenkovich, Director US Western Regional Sales, AllOut Security Software	**Make Picking Great Again: Warehouse Strategies for JDE** **KOOS MFG.** & **rfsmart** A recent study showed companies are losing an average of nearly $400K/year due to mis-picks (from wasted human-hours, extra shipping, and excessive production time). Hear from AG Jeans (Koos) on how they leverage Oracle JDE & RF-Smart to streamline their B2C eCommerce picking operations-increasing accuracy & customer satisfaction. **Objectives:** -Lessons Learned -Brief Demo on how to consolidate and sort the picking assignments **Speaker:** David Gumpel, Business Analyst at Koos Manufacturing/AG Jeans
	2:45 PM – 3:30 PM	**3:30 PM – 4:00 PM**	**3:30 PM – 5:30 PM**
