- Form service
- Rules
- White list
- Cross-reference
- Custom Java

- Studio
- Studio home page
- Transformations
- Where used
- Import/Export
- Orchestration UDOs

- Studio 6.0.2
- Data service
- AIS Version 2
- Output format
- Message service
- Outbound REST
- Groovy
- Nested orchestrations
- OAuth 2.0 outbound
- Iterate over steps
- Database connector
- Watchlist as a step
- Notifications

- Studio 6.1.0
- Process Recorder
- Report as a Step
- File Transfer
- Confirmed Completions
- Studio
  Enhancements

- Real Time Orchestrations\*
- Message Center\*
- Orchestrator Monitoring\*
- Health Monitor\*
- Error Handling\*
- Resilient Scheduler Input from CSV\*
- Assigned Subscriptions
- Resilient Scheduler

\* Planned

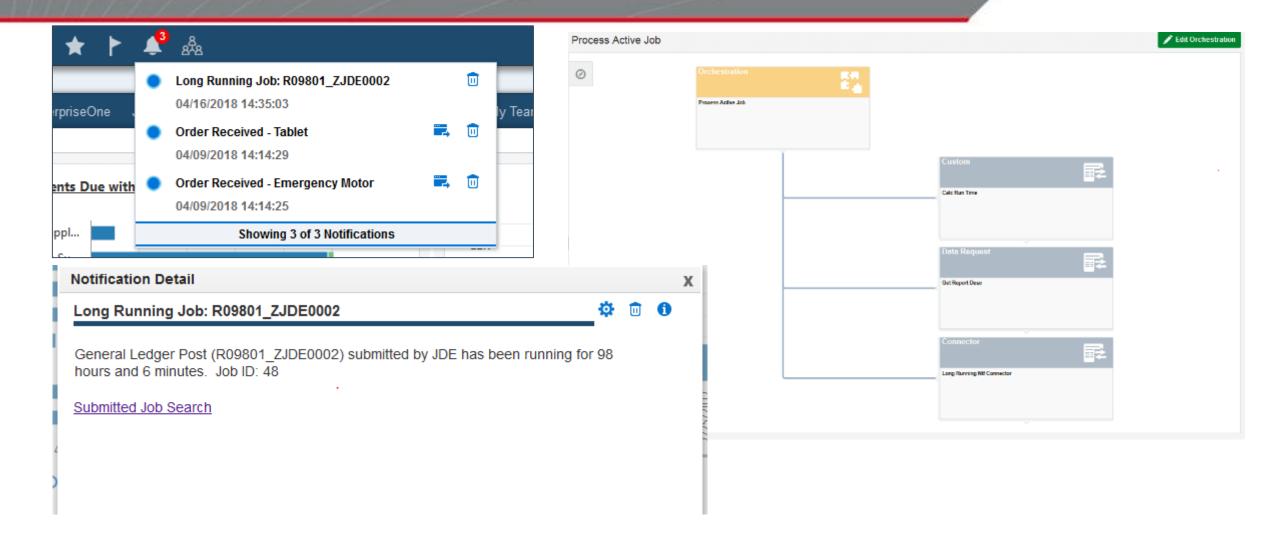

# **Notifications**

- Keep workers in touch and informed about critical events even when they are away or not signed on to EnterpriseOne
- Detect important events or conditions based on JDE business data or external systems
- Send custom messages and application links to subscribers via the EnterpriseOne user interface, Work Center, or e-mail
  - Low inventory
  - Shipment arriving
  - Equipment down
  - Any JDE data. Any external data

# Notifications for Long Running UBE

# Orchestrator and Notification Enhancements

Planned

### Message Center

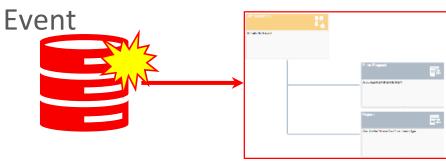

# What you need to know. What you need to do.

- Message Center
  - Notifications and Traditional Work
    Center messages
  - Ability to search, sort and group
- Orchestrator Monitoring
  - Health of orchestration at a glance
  - Improved diagnostics
- Real Time Orchestrations
  - Launch an Orchestration from a Table
    Event
  - Preform actions real time

### **Orchestrator Monitor**

Launch from a Table

# **Extensibility Framework**

# Ways to Tailor JD Edwards

### **Personalization**

UI changes to improve the experience of each business user

# **Configuration**

Setup EnterpriseOne to meet the needs of the organization's business processes

# **Extensibility**

New and changed functional flows that extend business logic

### **Customization**

Technical changes to forms, logic and database to solve company-specific business requirements

# JD Edwards EnterpriseOne Frameworks

### **Continuous Stream of Enhancements**

- Page Composer
- Images

- Form Personalization
  - Move Fields
  - Hide Fields
  - Resize Fields
  - Change form name
- List view grid format
- Spring board
- Watchlist Pane
- External Forms

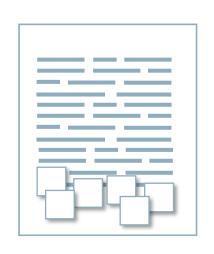

- Form Personalization
  - Change Tab Sequence
  - Make Fields Required
  - Rename Fields
- Enterprise Search
- Task Search

- Form Extensibility
  - Add Business view columns Query Forms
  - Add Business view columns (Edit Forms)\*
  - Orchestrator Support\*
- Form Personalization
  - Personalize Exits
- Rename Grid headers

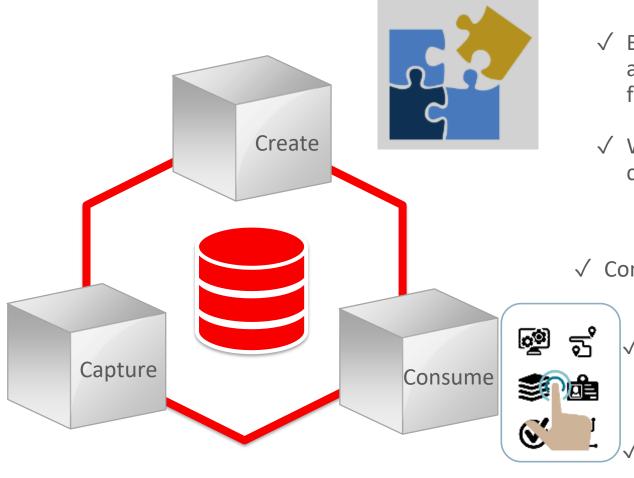

\* Planned

# Adding Business View Columns on Forms

- ✓ Capture additional information
- ✓ Meet industry and regional additional data requirements
- ✓ On the glass

√ Create Holistic Solution

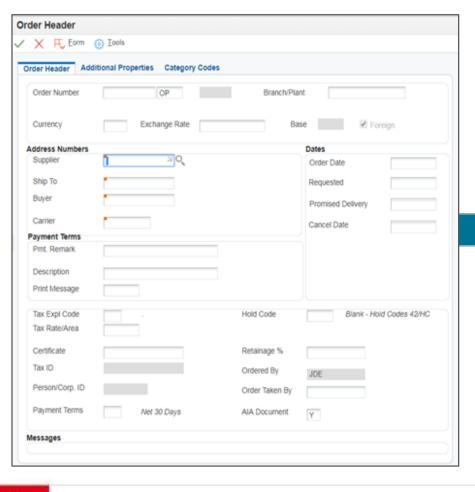

- ✓ Build solution by using additional information in frameworks
- √ Without creating barriers for continuous adoption

- √ Consume in Frameworks
  - Orchestration can now transact with additional information
  - Personalize form, create alerts, connect using Café One etc.

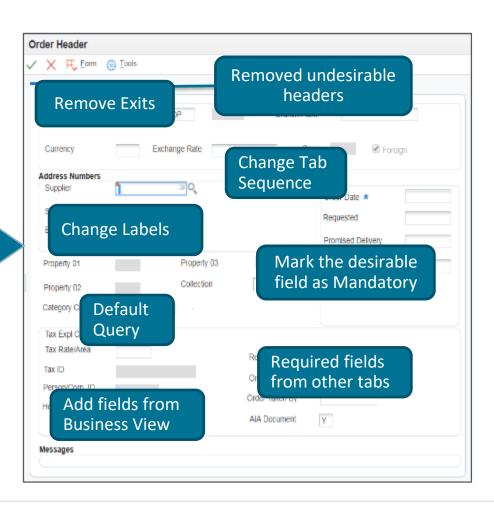

# **Application Extensibility**

### Tailor without customization

- ✓ Reduced Complexity
- ✓ RetireCustomizations
- ✓ Simplified Data Entry
- √ Personalize on the glass

# User Defined Objects Management

# System Admin Enablement Framework

# JD Edwards System Administration

### **Continuous Stream of Enhancements**

- Server Manager Foundation and REST API Enhancements
- Enhancements to Simplify Staying Current
- JD Edwards with Exa Data Cloud Service
- Server Manager As Service Provider
- Platform Neutral Provisioning Windows
- Simplified Upgrade on a One-Click Provisioned Target
- Store Media Objects in Database or File System
- Objects to Database
- Oracle Cloud Marketplace Images for JD Edwards EnterpriseOne Applications 9.2
- Platform Neutral Provisioning System I SMC
  Support
- JD Edwards EnterpriseOne Migration Utilities for Windows

- iOS 9.0.1 Certification
- Currency Support in Data Aggregation
- Universal Cache Browser
- Management of Internet of Things Orchestrator
  Components as User Defined Objects
- Track Object Usage
- One-Click Provisioning
- JDE Cloud Provisioning Console
- Mobile Cloud Service: Single Sign-on and Support for Mobile Watch-lists
- Integration to Oracle Content and Experience Cloud Service
- JD Edwards One-Click Provisioning for Oracle Technology Stack

See Release Comparison report in Product Catalog

# Service Enablement of Server Manager

### • What:

- Server Manager is already equipped with provisioning, monitoring and management capabilities
- Introduced a REST Enablement layer in Server Manager to expose these functionalities as REST APIs

### • Why:

- Enable automation of common tasks
- Expose SM functionality to other tools
- Leverage standard based orchestration tools

### How (REST APIs for)

- Provisioning
- Configurations (ini)
- Monitoring
- Change Management (Tools Patching)

# Foundation for Future Simplifications

# EnterpriseOne Health Checks from Server Manager

### What:

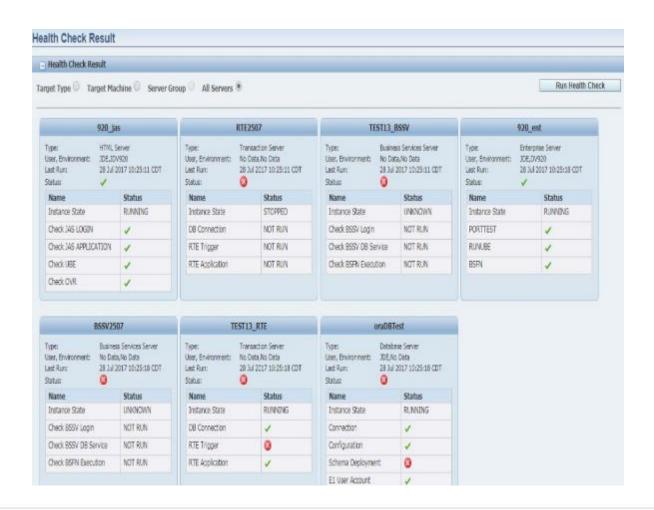

- Automated health monitoring capability to improve the availability and reliability of JD Edwards EnterpriseOne servers
- REST API enablement for Health Checks

### Why:

- Enable automated assessment of existing
  JD Edwards EnterpriseOne environments
- Leverage in other End to End automation

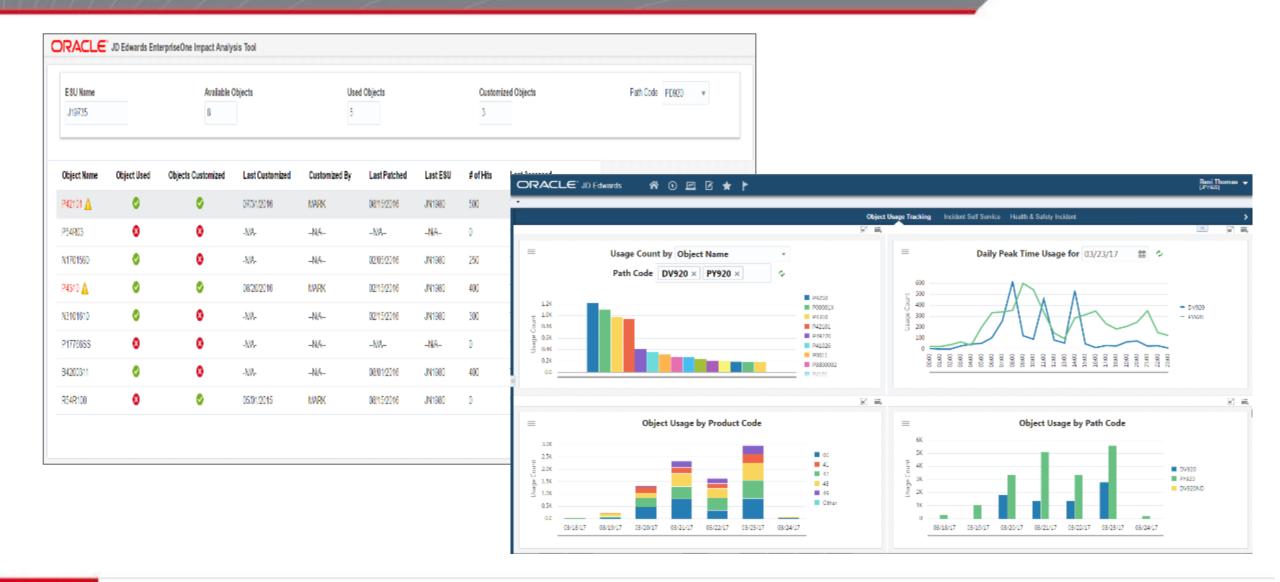

### • How:

- Enhanced Server Manager functionality
- Enhanced Server Manager UI
- Enabled REST APIs for health checks

# Object Tracking and Impact Analysis

# Improving the Foundation

# 64-Bit Enablement

### What

- No impact to business processes and data
- Enablement for Enterprise server to round out 64-bit architecture
- Customers have choice and control on when to enable 64-bit

### Why

- Maximize the current JD Edwards architecture
- Future proof your JD Edwards investment and avoid hardware and software obsolescence
- Positioned to enable future JD Edwards product innovation
- Performance Improvements

### How

- Support Apps Release 9.2
- Enabled with Tools Release 9.2.3 (Linux, Microsoft, IBM i)
- Utilities to automate process

### When

- Upgrading to applications release 9.2
- As part of an upgrade to the latest Tools update
- As part of your continuous adoption strategy
- As driven by technology and business requirements

# Platform changes

### **Upcoming Certifications**

- Microsoft Visual Studio 2017 (Enterprise Server, Deployment Server, Dev client)
- Mozilla Firefox 60 ESR
- Apple iOS 12
- Oracle Database 18c
- Oracle Access Manager & Oracle Internet Directory "12c"

### Retiring

Starting with 2018 (9.2.3)

- Microsoft Windows Server 2012
- Microsoft Visual Studio 2010
- Mozilla Firefox 45 ESR

Starting with 2019 Winter

- Microsoft Windows 7, 8.1
- Microsoft SQL Server 2014
- Oracle Weblogic Server 12.1.3

# Feature Retirement

Planned

- Workflow Modeler (64 Bit Foundation)
- Unified Logon on Windows Server
- JDBNET
